

mathdecisions5.html

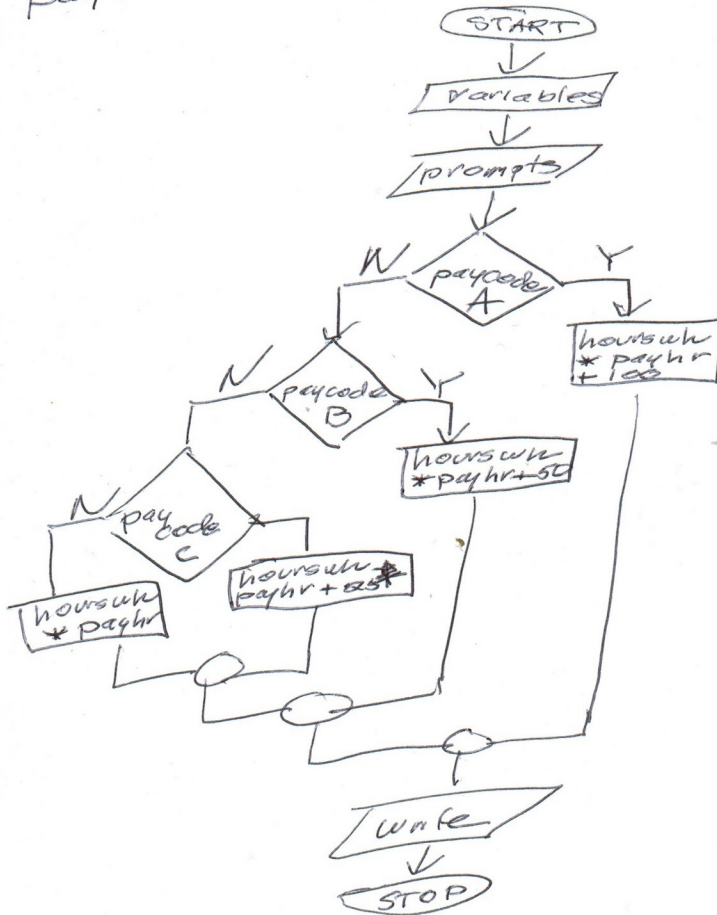

①

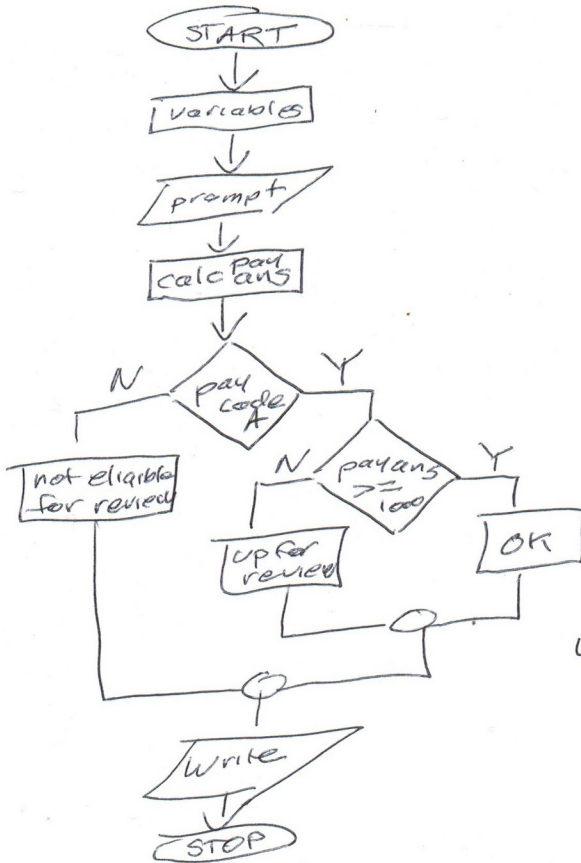

mathdecisions better 5.4

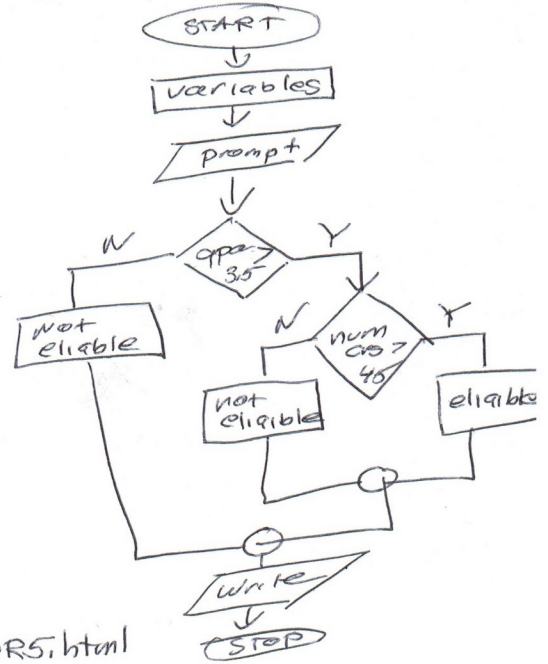

paycheckfirst5.html

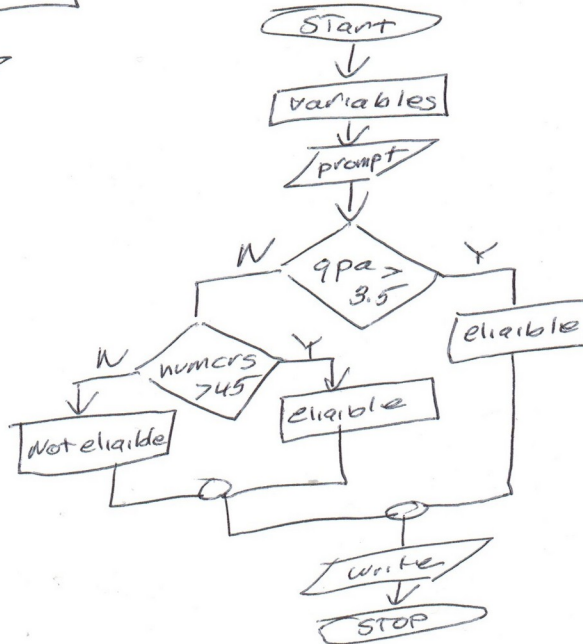

paychedusecond 5.html

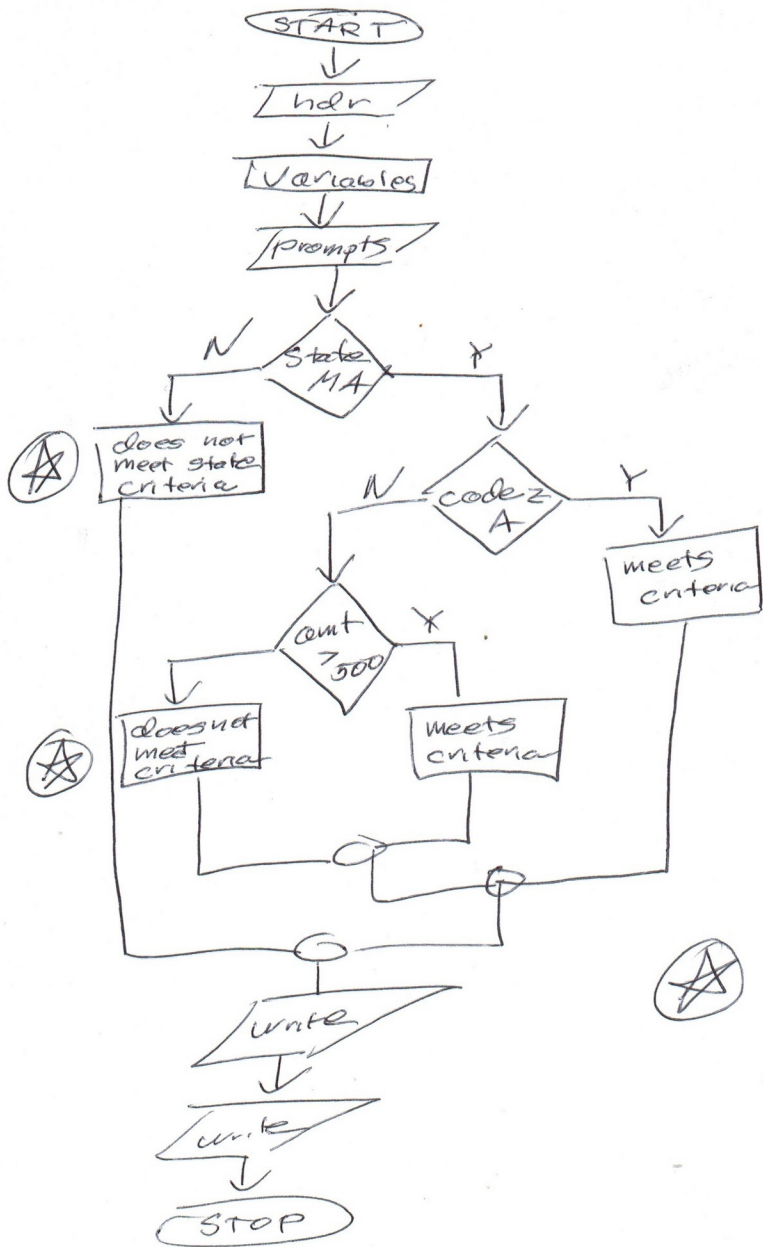

Using AND 5.html ②

Using OR 5.html

and either 5.htm

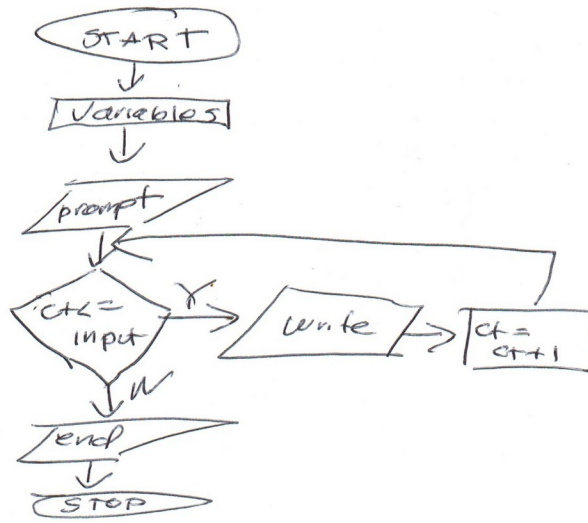

and either com 5.htm

the two outputs for not meeting criteria have to be the same if you use a compound

# while loop 5.html

# LOOPS

# do loop 5.html
